

## How to Move a Long Load Around Obstacles

Sometimes there is no easy way to get from point A to point B. In the case of Argonne National Labs, they had to maneuver a newly delivered component from outside to inside, then through multiple chokepoints. Using AeroGo power drives with an air caster rigging system, two operators were able to finesse the long load through a labyrinth of narrow corridors and doorways in record time. See how they did it [here](#).

At AeroGo, our #1 goal is to figure out a way to make your move happen, no matter what size, shape, weight, or location. Capitalize on our expertise and gain a partner that reduces your downtime and headaches. Send us a quick note about your application at [this link](#). Better yet, give AeroGo a call at 1-866-537-0153 or [live chat](#) with us right now. Let's get your problem solved!

## Is It Time to Replace or Upgrade Your Air Casters?

High-performance AeroGo air bearings fit most any air bearing system. Even if we didn't provide your original air casters, you will love the superior durability of AeroGo air bearings. It doesn't hurt to keep a couple spares on the shelf, so why not [order now](#)? Call us at 1-866-537-0153 or [live chat](#) or [learn more here](#).

## Everything you need to move up to 34,000 lbs.

Just add air! This Portable Rigging Kit includes everything you need to move tall, short, wide, long, or uneven loads using your available compressed air. Best of all, it can be used over and over again and stores in a handy rollable case (included).

**"Moving heavy loads of 50-200 tons can be a challenge."**

Cranes, conveyors, rails and other traditional equipment can be hazardous and hard to maneuver. Now there's a better way...wheeled transporters. [See one in action here.](#)

AeroGo's Silverback wheeled transporters are ideal for moving 50-200 ton loads - and they operate on most factory floors. Compared to traditional load moving solutions like cranes, conveyors and rail, Silverback wheeled transporters are:

- \* Portable and flexible
- \* More maneuverable, with omnidirectional controls and rotation for tight spaces
- \* Lower cost in use
- \* Ready to run on delivery

Here are just a few of the unique features that set them apart from other wheeled transporters on the market:

- \* Compact and low profile - designed to maximize floor space
- \* Self-loading capability Radio remote controlled
- \* Customizable
- \* Full operator interface with diagnostics and alarms

It's another way AeroGo - a proven leader in equipment and material transport systems - is making it easier for you to move heavy loads in nearly any operating environment.

Contact AeroGo today to see how we can make your moves easier. Send us a quick note about your application at [this link](#). Better yet, give AeroGo a call at 1-866-537-0153 or [live chat](#) with us right now. Let's get your problem solved!
