Financial
Roller Coaster**

Page 44

A large, complex satellite antenna structure is being moved by an AeroGo system in a cleanroom. The antenna is covered in blue protective material and has several large, circular dish-like components. It is suspended by a network of cables and is being moved along a track. Several people in white lab coats are standing around the antenna, observing the process. The cleanroom has blue walls and a tiled floor. A white arrow points from the text box to the AeroGo system.

**AeroGo's product
moving another custom
delicate load safely on
a cushion of air.**
