

“It took **4 minutes** to move 10,000 lbs – we saved **8 hours!**”

## Air Casters Save Time and Money

We did not make this up: A customer just emailed to say how excited they were to SAVE AN ENTIRE DAY of production, just by using air casters: "We planned a day of downtime to move our 10,000 lb. load, but it took a grand total of 4 minutes. What a time saver!" If you haven't already tried using the power of compressed air to move loads from 500 lbs. to 5000 tons, give AeroGo a call at 1-800-426-4757 or [live chat](#) with us right now. See examples of what can be moved at <http://www.aerogo.com/applications/rigging/>.

### Is it time to replace your air bearings?

It doesn't hurt to keep a couple spare Aero-Casters on the shelf, so why not order now? AeroGo manufactures air bearings to fit AeroGo equipment as well as competitive models. Call us at 1-800-426-4757, [live chat](#) or [learn more here](#)

### No air? No problem!

The NEW AeroGo Silverback Wheeled Vehicle line provides up to 200 tons of load moving muscle for locations where compressed air is unavailable. AeroGo wheeled vehicles are available in 3 standard sizes. The Silverback Wheeled Vehicle is already proven reliable for factory automation. The 40 ton Silverback was selected as a finalist for "Product of the Year" by Plant Engineering magazine. [Learn more](#)
